

Detector Loan Agreement

This document sets out the conditions of the loan of a TeachSpin muon physics detector and supporting equipment consisting of electronics interface, pc and connecting cables. Each school loaning the detector must sign this document, return it to Queen Mary project co-ordinator before the kit is used in the school.

1 Duty of Care and Security

- 1.1** The detector and supporting equipment is worth £4,000 and must be placed on the school's insurance policy. Proof that it has been added must be sent to the Queen Mary Project co-ordinator before the equipment is used.
- 1.2** In the event of loss of the detector and/or supporting equipment, the school will be liable for the full cost of the detector, through insurance or otherwise.
- 1.3** In the event of damage to the detector and/or supporting equipment, the school will be liable for the costs of repair, through insurance or otherwise. If the detector and/or supporting equipment is irreparable, they will be liable for the full market value of the detector and/or supporting equipment.
- 1.4** The kit should never be used unsupervised. If measurements are required over a long period (such as overnight), the kit must be in a locked environment during that time. The kit must always be locked away when not in use.
